Glass Froster / Freezer Cabinets

Designed AND manufactured
exclusively in the UK

The new *eCold* range from Osborne Refrigerators is designed to be good to your pocket as well as the environment. Low-voltage fans and LED lighting put very little waste heat into the cabinet and improved insulation and efficient compressors maximise cooling performance while using less energy. *eCold* cabinets are also designed to be virtually maintenance-free, with no fluorescent tubes to change, and condensers that never require unblocking.

Osborne Refrigerators Ltd were established more than six decades ago and we are the leading British manufacturer of refrigerators designed for the display and storage of wine and cold beverages. All our products are designed and manufactured in our West Sussex factory, and always have been. As well as our display cabinets, which are specified by leading breweries, drinks manufacturers and leisure companies across the world, we also manufacture stainless steel solid door catering chillers and a range of specialist milk cabinets.

All our refrigerators use hydrocarbon refrigerant (alternatives available for some models), CFC free polystyrene insulation and can be efficiently recycled at the end of their life.

The Osborne product range is always evolving, due to our commitment to continuous improvement and also in response to specific customer requirements. We have built an enviable reputation for the quality and reliability of our refrigerators and we will never stop working to maintain that reputation.

Our reduced height (805mm) *eColdN* freezer cabinets are available in two widths, 490mm and 595mm. They are designed for either the storage of frozen foodstuffs, or for use as a glass froster. They are manufactured from stainless steel, with a stainless steel interior. The cabinets use a cold-wall refrigeration system and the maintenance-free condenser is fan-cooled for increased efficiency. Insulation is environmentally friendly polystyrene and the refrigerant is R600a hydrocarbon. Standard solid doors are hinged and lockable. These models are perfect companions to the reduced height *eCold* range of display fridges.

eColdN Undercounter Glass Froster / Freezer Range

	32EF	162EF
H (mm)	805	805
W (mm)	493	600
